The Enhanced Banking Solutions

The move towards a
digital way of banking

The Need for Banks to go Digital

The younger generation has grown up in a digital age where their smartphones, laptops, tablets, etc. Are an important part of their everyday lives. Bringing an online banking experience to these customers is essential:

To allow remote access to banking services and make their lives easier

Reduces the geographical barriers allowing you to reach more customers

Customers have access to 24/7 banking services all year round, even on holidays

The Growth of Digital-only Banks catering to Gen Z and Millennials

Millennials and Gen Z are the most important demographic and economic forces of our times. In 2020, they constituted around 35% of the global workforce. This has led to an increase in demand for digital-only banks that cater to the needs of millennials and Gen Z. Neobanks are growing at a rate of 46.5% and are estimated to hit a value of USD 394.6 billion by 2026.

Transformation Criteria for IT Solutions

End-of-Life Systems

Still holding onto end-of-life legacy systems that are more vulnerable to security threats

Non-scalable In-house Legacy Systems

Using legacy systems that are obstructing and slowing down your business growth

Obsolete Technology

Ready to leave behind obsolete technology and embrace digitization of the banking world

What Aspire Systems has to offer?

Core Banking

Multi functional scalable solution through modern market leading solutions

Digital Solutions

Your one-stop solution shop for all your ancillary digital solutions

Payments

From paper to digital wallets, advanced capabilities for all your business needs

Analytics

Rich insights and dashboards to drive better decision-making

Cloud Hosting

Increasing agility and enhanced business value with everything on the cloud

DevOps

Faster development of new solutions and easier maintenance of existing deployment

General Ledger

Accounting has gone digital with our highly automated financial processing capabilities

Testing

End-to-end test automation to enable faster time to market

Risk & Compliance

Addressing the time to time changing regulatory needs

The Aspire Advantage

Plethora of new-age solutions addressing gaps in the base solution

Readiness of Integrated solutions leading to faster implementation

End-to-end Digital and Core Banking Solution Provider

Tool based approach for End-to-end Data Migration

Our Delivery Models

Consultation

Analysis to determine the right product and fitment that works for you

Upgradation

Enhancements to make systems future-proof

Implementation

Expertise to deploy the proposed solutions in a planned timeline

Support

Post-deployment support for break fixes and changes

Our Transformation Strategies

Wrap the Core

Elevate your legacy core with a layer of new technology to mitigate the risk of change, thereby allowing you to bring digital capabilities to your customer journeys and operations.

This means banks with an existing scalable core architecture can modernize individual non-core segments using digital banking as the front-ending solution which can be easily integrated with external ecosystems.

Complete Digital Transformation

Popularly known as the rip and replace methodology, this one-step production rollout transforms your core with comprehensive and modernized technologies, with business and data migration set to occur at the end of the program.

From payments to risk-related solutions and enterprise solutions including BPM, analytics together with digital channels can be completely transformed and rolled out for universal banking systems.

Our Homegrown Accelerators

DYOB (Design Your Own Digital Bank)

An ultra-personalized service that gives customers the control to personalize their own digital banking experiences.

Imagyn.ai (AI in banking)

It is a loosely coupled framework that enables banks to take a strategic and consistent customer-first approach.

AFTA for Banks (Aspire's Framework for Test Automation)

It is an optimum, homegrown Selenium-based framework that involves AI components to ensure continuous testing for continuous delivery.

Our Expertise in Geo-wise Marketplace Integrations

We have been providing an enriched customer experience to our clients through several services ranging from ID scanning, digital wallet, authentication, fund transfer, payment, and many more.

Here are some of the many marketplace integrations served by us.
