

iSpell

AI-Powered Migration of Legacy Integration Tools

The Challenge: Legacy Integration is Holding Your AI Strategy Hostage

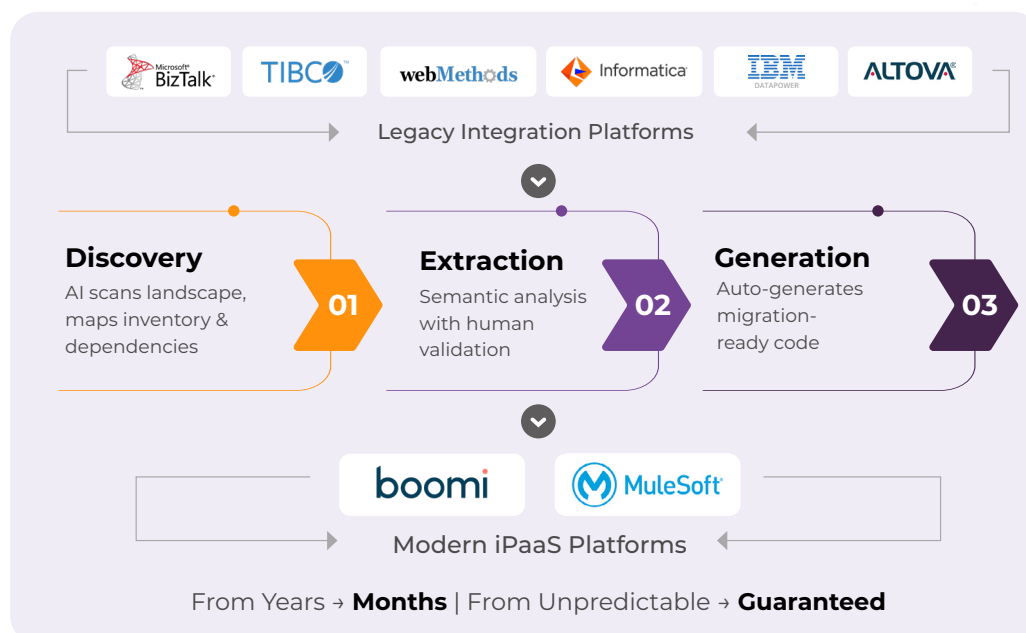

While enterprises aggressively pursue AI-powered migration, critical foundational layers—Data and Integration infrastructure—are being overlooked.

- Decades-old systems creating “black box” complexity
- Manual migration projects fail or overrun by 2-3x
- M&A activities creating disparate platform sprawl
- Hidden dependencies derail modernization efforts

The iSpell Solution: AI-Powered, Predictable & Accelerated Modernization

iSpell is a proprietary AI-powered migration platform that enables enterprises to modernize legacy integration platforms and migrate to modern iPaaS solutions (Boomi, MuleSoft) with unprecedented speed, accuracy, and confidence.

Migrate FROM:

BizTalk, TIBCO,
Informatica,
WebMethods,
Altova, IBM
DataPower, IBM
Sterling Integrator

Migrate TO:

Boomi
AtomSphere,
MuleSoft
Anypoint
Platform

Business Impact: Why iSpell Changes Everything

50% Faster Time-to-Market

Accelerate migration timelines from years to months with AI-powered automation replacing manual, error-prone processes.

50% Cost Reduction

Eliminate cost overruns and resource inefficiencies typical of manual migrations through predictable, structured execution.

Risk Mitigation & Confidence

Comprehensive discovery uncovers hidden dependencies and complexity before migration begins, eliminating surprises.

AI-Ready Foundation

Modernize critical integration infrastructure required for successful AI initiatives—the layer most enterprises overlook.

Who Benefits from iSpell?

Enterprises with Aging Platforms

BizTalk, TIBCO, WebMethods
reaching end-of-life

AI Transformation Leaders

Need modern integration foundation
for AI initiatives

M&A-Driven Complexity

Multiple disparate integration
platforms to consolidate

CIOs Facing Budget Pressure

Need predictable, cost-effective
modernization path
