

# Aspire Customizes an Oracle Fusion Mobile App to Streamline Time & Expenses Management for a Leading Global Provider of Tax Services

## Challenges:

- *Lack of custom mobilization of Fusion SaaS web application to perform Time and Expenses transactions*
- *OpenAM-based single sign-on integration in the mobile app*
- *Additional parallel DB in Oracle cloud to track the source of transactions and increase auditability*

## Solution:

- *Upgraded mobile app architecture to include Oracle ATP cloud DB*
- *Maintained master and transaction tables for last 6 months' data*
- *Created reports in Oracle Fusion to pull master and transaction data*
- *Scheduled integrations in OIC to sync the DB*
- *Upgraded mobile app to fetch the master data and transactions from Oracle ATP*

## About The Customer

PricewaterhouseCoopers (PwC) is one of the world's leading providers of high-quality assurance, advisory and tax services. They comprise a network of firms in **155 countries** - with over **284,000 people** committed to delivering business-consulting-led services. Their expertise covers industries like aerospace, automotive, hospitality, insurance, banking, healthcare, transportation, and more. PwC also works closely with governments to meet the demands of citizens in developing nations.

## The Need

PwC implemented the Oracle Fusion R12 for their HCM Time and Labor and Financials Expenses functionalities. It lacked custom mobilization of Fusion SaaS web application to perform Time and Expenses transactions. The client wanted a unified mobile app for two modules – Expense management and Timecard in one single app. It was also crucial to synchronize the master and transaction data between the Fusion and Oracle ATP cloud DB.

## Results:

- *Streamlined Fusion SaaS processes – 25% effort savings*
- *'Anytime anywhere' access to perform time, expenses and approval-related tasks*
- *Faster processing of transactions*
- *Audit storage and archival mechanism*

## Technology Snapshot

- » Oracle Fusion SaaS
- » Oracle HCM Cloud
- » Oracle Finance Cloud
- » Oracle Mobile Hub
- » Oracle Integration Cloud
- » Oracle ATP DB

## Aspire's Solution in Detail

Aspire helped the client upgrade their mobile app architecture to fetch the master data and transactions from Oracle ATP. We created a DB structure similar to Oracle Fusion to store all the data for the last **6 months** with quick report generation capabilities. With scheduled integration in the OIC, it became easy to sync both the DBs and create a copy of transactions. Aspire also ensured that the solution was fully customizable to accommodate the territory-wise changes, as required by the client. Other solution highlights included:

- Scheduled orchestrations in OIC to sync the data
- Custom REST services using ORDS from the Oracle ATP DB
- Audit data in a parallel DB

## Benefits

Aspire's highly scalable and customizable solution empowered PwC to mobilize and streamline their Fusion SaaS processes – leading to **25%** effort savings. Their users can now access the mobile app 'anytime anywhere' to carry out their time, expenses and approval-related tasks and improve their productivity levels. It enabled faster processing of transactions with improved mobile performance. The newly implemented solution also came equipped with audit storage and archival mechanism.

Aspire Systems is a global technology services firm serving as a trusted technology partner for our customers. We work with some of the world's most innovative enterprises and independent software vendors, helping them leverage technology and outsourcing in our specific areas of expertise. Our core philosophy of "Attention. Always." communicates our belief in lavishing care and attention on our customer and employees.
