

Aspire helped a leading **auto lending software provider** in the US to develop their **loan origination software product**

Challenges:

- *Product line expansion*
- *Feature enhancements*
- *Poor scalability*

Solution:

- *Loan Origination System Software Implementation through DevOps*

Results:

- *Faster Time to Market*
- *Faster revenue generation*
- *Flexible usability and configuration*
- *Easy data analysis and report generation*

About the Customer

The client develops SaaS based loan origination software solutions for small and mid-size, and large auto finance lenders. They are a leading player in the United States, catering to banks, credit unions, and auto lenders.

The Need

The client was looking for assistance in setting up a dedicated product development team, who will take requests for feature enhancements from their customers and manage processes and estimates through testing and delivery of the Loan Origination System Software.

Aspire's Solution

After careful analysis of the customer's requirement, Aspire's team of technology consultants deployed

- Loan Origination System Software implemented using DevOps. The front end of the system was developed using Angular.js, React.js and Razor while the back end resides on SQL server.
- Lenders can easily fetch information they need through integrations with the industry's most powerful third-party data sources such as DealerTrack. The lenders can also self-integrate using flexible APIs and the system is entirely configurable with users being able to set up their own decision rules.

Technology Snapshot

Front-end – Angular.js, React.js, Razor

Back-end – SQL server

Aspire Systems is a global technology services firm serving as a trusted technology partner for our customers. We work with some of the world's most innovative enterprises and independent software vendors, helping them leverage technology and outsourcing in our specific areas of expertise. Our core philosophy of "Attention. Always." communicates our belief in lavishing care and attention on our customer and employees.
