

Aspire's End-to-End Test Automation Accelerator reduces 90% of testing costs for a Global Manufacturer

Challenges:

- *Difficulty in creating test automation scripts for SAP S4HANA*
- *Unable to achieve seamless flow of information between SAP S4HANA & other integrated web applications*
- *Improve quality of test scripts for SAP application*
- *Parallel execution in different machines*

Solutions:

- *Created efficient Test Automation solution for SAP S4HANA*
- *Automated entire regression suite with Tricentis Tosca for simultaneous testing*
- *Performed parallel execution with DEX on different machines*
- *Scheduled and executed scripts using windows scheduler, without manual intervention*
- *Generated customized reports & were email notified based on requirements*

About The Customer

- Our customer is a global leader in offering technology for products, systems, software, and services to worldwide construction companies.
- They have **120+** offices worldwide

The Needs

- Build an end-to-end test automation strategy and reporting approach for continuous flow of information among SAP S4HANA, a desktop application and other integrated web applications
- Enhance quality of test scripts for SAP applications and integrated chrome applications
- Implement Continuous Integration/Continuous Delivery, parallel execution on different machines & refactoring, and also achieve minimization of test suites
- Optimize scripts for repetitive testing in different environments
- Improve reliability of test scripts using different test datasets

Benefits:

- *Maintenance costs were reduced to less than 10%*
- *Regression environment setup routine reduced by half*
- *Zero production defects while supporting 10+ production releases*
- *Savings of 40% time by leveraging reusable components*

The Challenges

- Difficulty in creating test automation scripts for SAP S4HANA, an intelligent Enterprise Resource Planning (ERP) application
- Unable to achieve continuous and seamless flow of information between SAP S4HANA and other integrated web applications

The Solutions

- Created a model-based Test Automation package from Tricentis that ensured SAP S4HANA application testing was performed efficiently and was integrated with SAP PI/PO to test data across systems
- Automated the entire regression suite with Tricentis Tosca to ensure quality through simultaneous testing on web and desktop that saved time
- Performed Parallel execution on different machines using DEX
- Utilized windows scheduler to schedule and execute the scripts without manual intervention
- Customized reports were generated and notified by email based on business requirements
- Using TC- Shell commands, executed the scripts without opening the workspace and used for continuous integration.
- Automated excel sheets to fetch data and perform actions inside excel using macros concept
- Connected reliable scripts to latest data with 'link to source'

Technology Snapshot

- » **Automation tool:** Tricentis Tosca
- » **Cloud-based cross platform:** SAP S4HANA

Benefits

- **500+** test cases prepared
- **100+** defects reported
- **500+** test scripts created
- Testing engagement with customer with **3** resources for a single product

Aspire Systems is a global technology services firm serving as a trusted technology partner for our customers. We work with some of the world's most innovative enterprises and independent software vendors, helping them leverage technology and outsourcing in our specific areas of expertise. Our core philosophy of "Attention. Always." communicates our belief in lavishing care and attention on our customer and employees.
