

Oracle Retail MOM Support Services for a leading US fashion retailer

ATTENTION. ALWAYS.

aspire 
SYSTEMS
attention. always.

ABOUT THE CUSTOMER

Our client is a leading women's fashion retailer with over 37 years of expertise in the industry. Headquartered in San Antonio, Texas, USA, they have established their presence with 40+ stores across the nation and one online store.

CHALLENGES

Our client, who is a leader in fast fashion retail with a huge customer base, stocked and sold items on weekly basis. Having recently implemented Oracle Retail Suite V15, they were facing major business challenges. There was no proper business process that was followed and the staffs were not given proper instructions to handle the application. Data migrated from the old platform were cluttered, unstable and inventory management was a huge challenge. Due to instability and inconsistent batch automation process, they were facing unexpected downtimes which affected the business. They were also in need of technical assistance to handle tools like SOS, to access and maintain Xstore database and a monitoring team to provide support services.

SOLUTION

Our production support team was deployed to analyze the issues in **Warehouse Management & Xstore**. Appropriate measures were taken, processes were streamlined and various levels of support were provided based on the need of the hour.

- An effective business process was put in place to enable prompt payment with minimum backlogs
- Performance issues resulting in markdowns were identified and analyzed
- Automated strips were created to maintain the high data quality in Xstore
- A Warehouse Management process was suggested to clear backstock inventory, overages etc.
- Business Operations Monitoring were channeled at every stage of the project to ensure seamless transition of data
- A backup mechanism was devised to avoid data loss during system failures

TECHNOLOGY SNAPSHOT

Technology:

Oracle Retail Suite V15

Tools:

PuTTY, SOS Scheduler,
Toad SQL Developer

Platform:

Java and SQL based
platforms

Programming Languages:

PL-SQL, JAVA, Shell

RESULTS

- Single comprehensive support system to handle all business and IT related issues
